Dedicated to Klaus Denecke on the occasion of his 65th birthday

Abstract

De Morgan quasirings are connected to De Morgan algebras in the same way as Boolean rings are connected to Boolean algebras. The aim of the paper is to establish a common axiom system for both De Morgan quasirings and De Morgan algebras and to show how an interval of a De Morgan algebra (or De Morgan quasiring) can be viewed as a De Morgan algebra (or De Morgan quasiring, respectively).

Keywords: De Morgan algebra, De Morgan quasiring, D-algebra, interval algebra, Boolean element.

2000 Mathematics Subject Classification: 06E20, 06D30.

Support of the research of both authors by ÖAD, Cooperation between Austria and Czech Republic in Science and Technology, grant No. 2009/12 and of the first author by the Project MSM 6198959214 of the Research and Development Council of the Czech Government is gratefully acknowledged.
